For one of our client based in Switzerland, we are looking for a:

Project Manager Packaging & Labelling

Your role:

You will represent Packaging & Labelling function for new medical devices development activities ensuring compliance with regulatory and marketing requirements.

Your tasks:

- Lead packaging development and artworks creation
- Write, review and approve documents
- Establish Packaging & Labelling requirements and specifications
- Ensure availability of packaging materials for testing purposes
- Collaborate with internal (Quality, Regulatory...) and external (design agencies, materials suppliers...) partners
- Act as an expert in packaging technology and applicable standards
- Coordinate the definition of Instruction of Use
- Apply users needs into design inputs
- Support packaging test studies and life cycle management if needed

Your profile:

- University degree in Life Sciences related field
- Minimum 5 years' experience in the packaging development, ideally for medical devices industry
- Experience in labelling and artworks
- Understanding of regulatory constraints
- Basic knowledge of Medical devices standards (ISO 13485...) and regulations (MDR...)
- Background in project management
- Communication and organization skills
- Ability to interact with multiple stakeholders and cross-functional teams
- Fluency in English

Starting date: 1 May 2019

Location: French speaking part of Switzerland

Level: Project Manager

Domain of experience: packaging, labelling, artworks, medical devices, project management

Category: Medical devices

Closing date: 01 January 1970
