

Aston Life Sciences is the proud leading company in Consulting, Recruitment and Executive Search for the Pharmaceutical, Biotechnology, Medical Devices and Diagnostics industry. Based in Switzerland we serve Eastern and Western Europe, North America and Russia. Life Sciences is our passion and we are committed to successfully support our clients in their quest to improve patient's health all around the world.

Due to sustainable growth in our Engineering and new facilities projects, we are increasing our team of senior consultants and thus opening a new position to work on a Fill & Finish CAPEX project for Biotech industry.

Fill & Finish Project Manager - CAPEX project

Your role:

As Project Manager for Fill & Finish activities, you will lead the new project as from the beginning of the detailed design phase. You will be responsible for all the activities aligned with a Greenfield project for Fill & Finish including CIP (Cleaning In Place) and SIP (Sterilization In Place). You will be part of a 100M\$+ project and will lead the process and engineering activities.

Your tasks:

- Within the Project Team, you will be responsible to transform production requirements into technical solutions through Detail Design, Construction, Qualification, Commissioning and productive Start Up for the fill & finish new facility
- You will support the engineering team, construction management, qualification and commissioning team in the future
- You will be responsible of the CIP/SIP systems
- You will liaise with all the CAPEX team to ensure delivery according to user requirements, process best practices, in accordance with quality and safety requirements.
- In a second phase, you will interact and coordinate equipment suppliers, Automation suppliers, Construction Company, commissioning and qualification teams in terms of Fill & Finish processes and equipment.
- You will be responsible and accountable for working according to GxP, health, safety and environmental requirements
- You will contribute to the delivery of the company strategy as well as supporting the financial CAPEX budgeting process for the engineering and Project Management Organization specifically for the Fill & Finish activities and processes

Your profile:

- Bachelor Degree in mechanical, process or chemical engineering, Dipl. Ing. or M.Sc. or B.Sc. or equivalent
- 10-15 years+ of experience in pharmaceutical/biopharmaceutical Fill & Finish new facility development
- Profound knowledge of aseptic filling or sterile products
- Huge understanding of CIP/SIP processes and activities
- Excellent management and leadership skills
- Strong communication skills
- High ability to work under pressure
- Fluent in English - French is a plus
