To be directly hired by one of the Medical Devices leaders in Switzerland, located in Bern area (Switzerland), we are looking for a:

Project Leader Embedded Software - German speaker

Bern area

Your role: Within the Technology division, you will act as Project Leader Embedded Software for the Product Development HW & SW department. One of the main missions will be to create the Software roadmap and to drive/coordinate embedded software projects.

Your tasks:

- Coordinate with agility an embedded software project team
- Create and maintain the software roadmap and the iteration plan (task and resource planning) of the embedded software project
- Estimate the workload, prioritize and coordinate the software tasks in cooperation with the stakeholders and the embedded software project team
- Act as the interface with the internal departments: Product Care, Quality Assurance, Regulatory Affairs, Risk Management, Systems Engineering and Patents
- Review the technical embedded software documentation

Your profile:

- Engineer (Bachelor, Master or PhD), specializing in electrical, micro, medical technology, computer science or comparable
- Several years of professional experience in project management in the field of software development
- Ability to work with various stakeholders on similar projects
- Professional experience in a regulated environment is an advantage
- Very good knowledge of English and German are required

Start date: 1 June 2020

Place of work: Bern area
