To be internally hired by one of the Medical Devices leaders in Switzerland, located in Solothurn area (Switzerland), we are looking for a:

Test Automation Software Engineer (German speaker)

Solothurn area

Your role: Within the Technology division, you will act as a Software Engineer to create and implement manual and automated acceptance /verification test for mobile apps, PC software and web applications linked with state-of-the-art Medical Devices. For this role, you will have the opportunity to work with flexible working hours and with home office option.

Your tasks:

- You create, maintain, implement and document manual and automated acceptance and verification tests for mobile apps, PC software and web applications
- You develop test cases and test scripts with suitable frameworks (e.g., Appium, Cucumber, Maven, Jenkins) using Java and C # programming languages
- You participate in the development and expansion of an in-house test infrastructure for automated testing of applications (HW / SW)
- You expand specialist knowledge with regard to automated and cross-platform testing of software (Class IIb Medical Device) in cooperation with internal and external partners

Your profile:

- Completed Engineer degree (FH / ETH / TU), preferably in the field of electrical engineering or computer science
- Experience in automated software testing, especially with app and web testing
- Good knowledge of the technical functionality of mobile platforms (smartphones) and the operating systems installed on them (iOS, Android)
- Strong experience in testing mobile apps on iOS and Android platforms
- Very good Java or C # expertise
- Experience with agile project methods
- Further training in software testing is an advantage (e.g. : ISTQB Certified Software Tester)
- Very good command of German and English

Start date: 1 April 2021

Place of work: Solothurn area
