### **Human Factors/Usability Engineer**

*Basel area*

**Your role:** Due to sustainable growth in our Human Factors/ Usability projects, we are developing our team of expert consultants (permanent contracts) to work with the various kind of innovative Medical Devices, including combination products.

**Your tasks:**

- Manage the Human Factors/Usability activities with internal and external suppliers
- Support corporate teams for the preparation and launch of new Medical Devices (for example drug delivery devices) on Human Factors/Usability aspects (FDA & EU)
- Continuously enhance state-of-the-art device expertise and exhaustive market knowledge on suppliers, technologies and competitors and share this expertise with other functions
- Support device development projects and the day-to-day business relationship with internal/external suppliers on Human Factors/Usability aspects
- Maintain industry contact and knowledge in order to identify early new business opportunities and bring innovation
- Implement global HFS (Human Factor Studies) Strategy
- Lead the design, documentation, execution and reporting of Human Factors formative and summative Studies (Drug Delivery Devices)

**Your profile:**

- Engineering/Psychology/HFE degree or equivalent
- Experience in medical device (preferably combination product) Human Factors Engineering
- Awareness of practical application of HFS regulation (IEC 62366)
- Strong knowledge of medical / disease impact on Human Factors
- Excellent team player with mature leadership and influencing skills
- Ability to represent the company and to negotiate at all levels both internally and externally
- Fluency in English is a must-have

**Start date:** 1 October 2020

**Place of work:** Basel area
